

Get your PhD in Applied Mathematics at the University of Colorado at Denver

The PhD Program in Applied Mathematics at the University of Colorado at Denver is looking for qualified students. We offer:

- ◆ Friendly, student accessible, world-class faculty in Computational Mathematics, Discrete Mathematics, Operations Research, and Probability and Statistics
- ◆ Cutting edge applications research at the Center for Computational Biology and the Center for Computational Mathematics
- ◆ Research and Teaching Assistantships
- ◆ Beowulf supercomputing cluster: 72 CPUs, 72GB memory, 2TB disk, for parallel applications, or run many programs simultaneously for massive experiments
- ◆ Computer network with Linux servers, high-speed color printers, and a high-speed reliable Internet connection
- ◆ A workstation or laptop for every graduate student
- ◆ Professional computing system administration and user assistance
- ◆ An exciting downtown location
- ◆ Opportunities for skiing and hiking in the Rocky Mountains
